

 **Help McCormick Taylor
Celebrate Earth Day, April 22
By Planting A Tree!**

This year, McCormick Taylor has a great opportunity to celebrate Earth Day with hands-on action – through our partnership with the Future of Life. The Future of Life is a non-profit organization that works to help children learn about and protect the environment; to learn more, visit the website www.futureoflife.org. MT hosts the organization and its three staff members in our Philadelphia office. You can find Janet, Amanda and Graham on the 9th floor.

McCormick Taylor
Engineers & Planners
Since 1946

The Future of Life has offered to provide a tree seedling for any MT employee to plant in honor of Earth Day. Simply **CLICK HERE** by 5 pm **Friday, April 25** to request your tree. Seedlings will be delivered within two weeks to each office. Planting and care instructions will be provided.

Shipping Information: All seedlings will be shipped to each office bare-root and will be approximately 10” - 20” each. The trees are extremely fragile and must be planted within

24 hours if possible or “heeled in” until planting is possible. The weather affects nursery operations; therefore, we cannot guarantee exact shipping dates.

Not able to plant a tree or have enough trees already? **Sponsor a tree** or **make a contribution** to Future of Life so they can continue their good work and plant more trees with children and youth!

Questions? Please call Janet at 215.592.4200, x1431

THANK YOU!
